

# Relay + Switchboard

---

AI Calling as Infrastructure

# What is **Relay**?

# Relay is a personal **Social Task Agent**

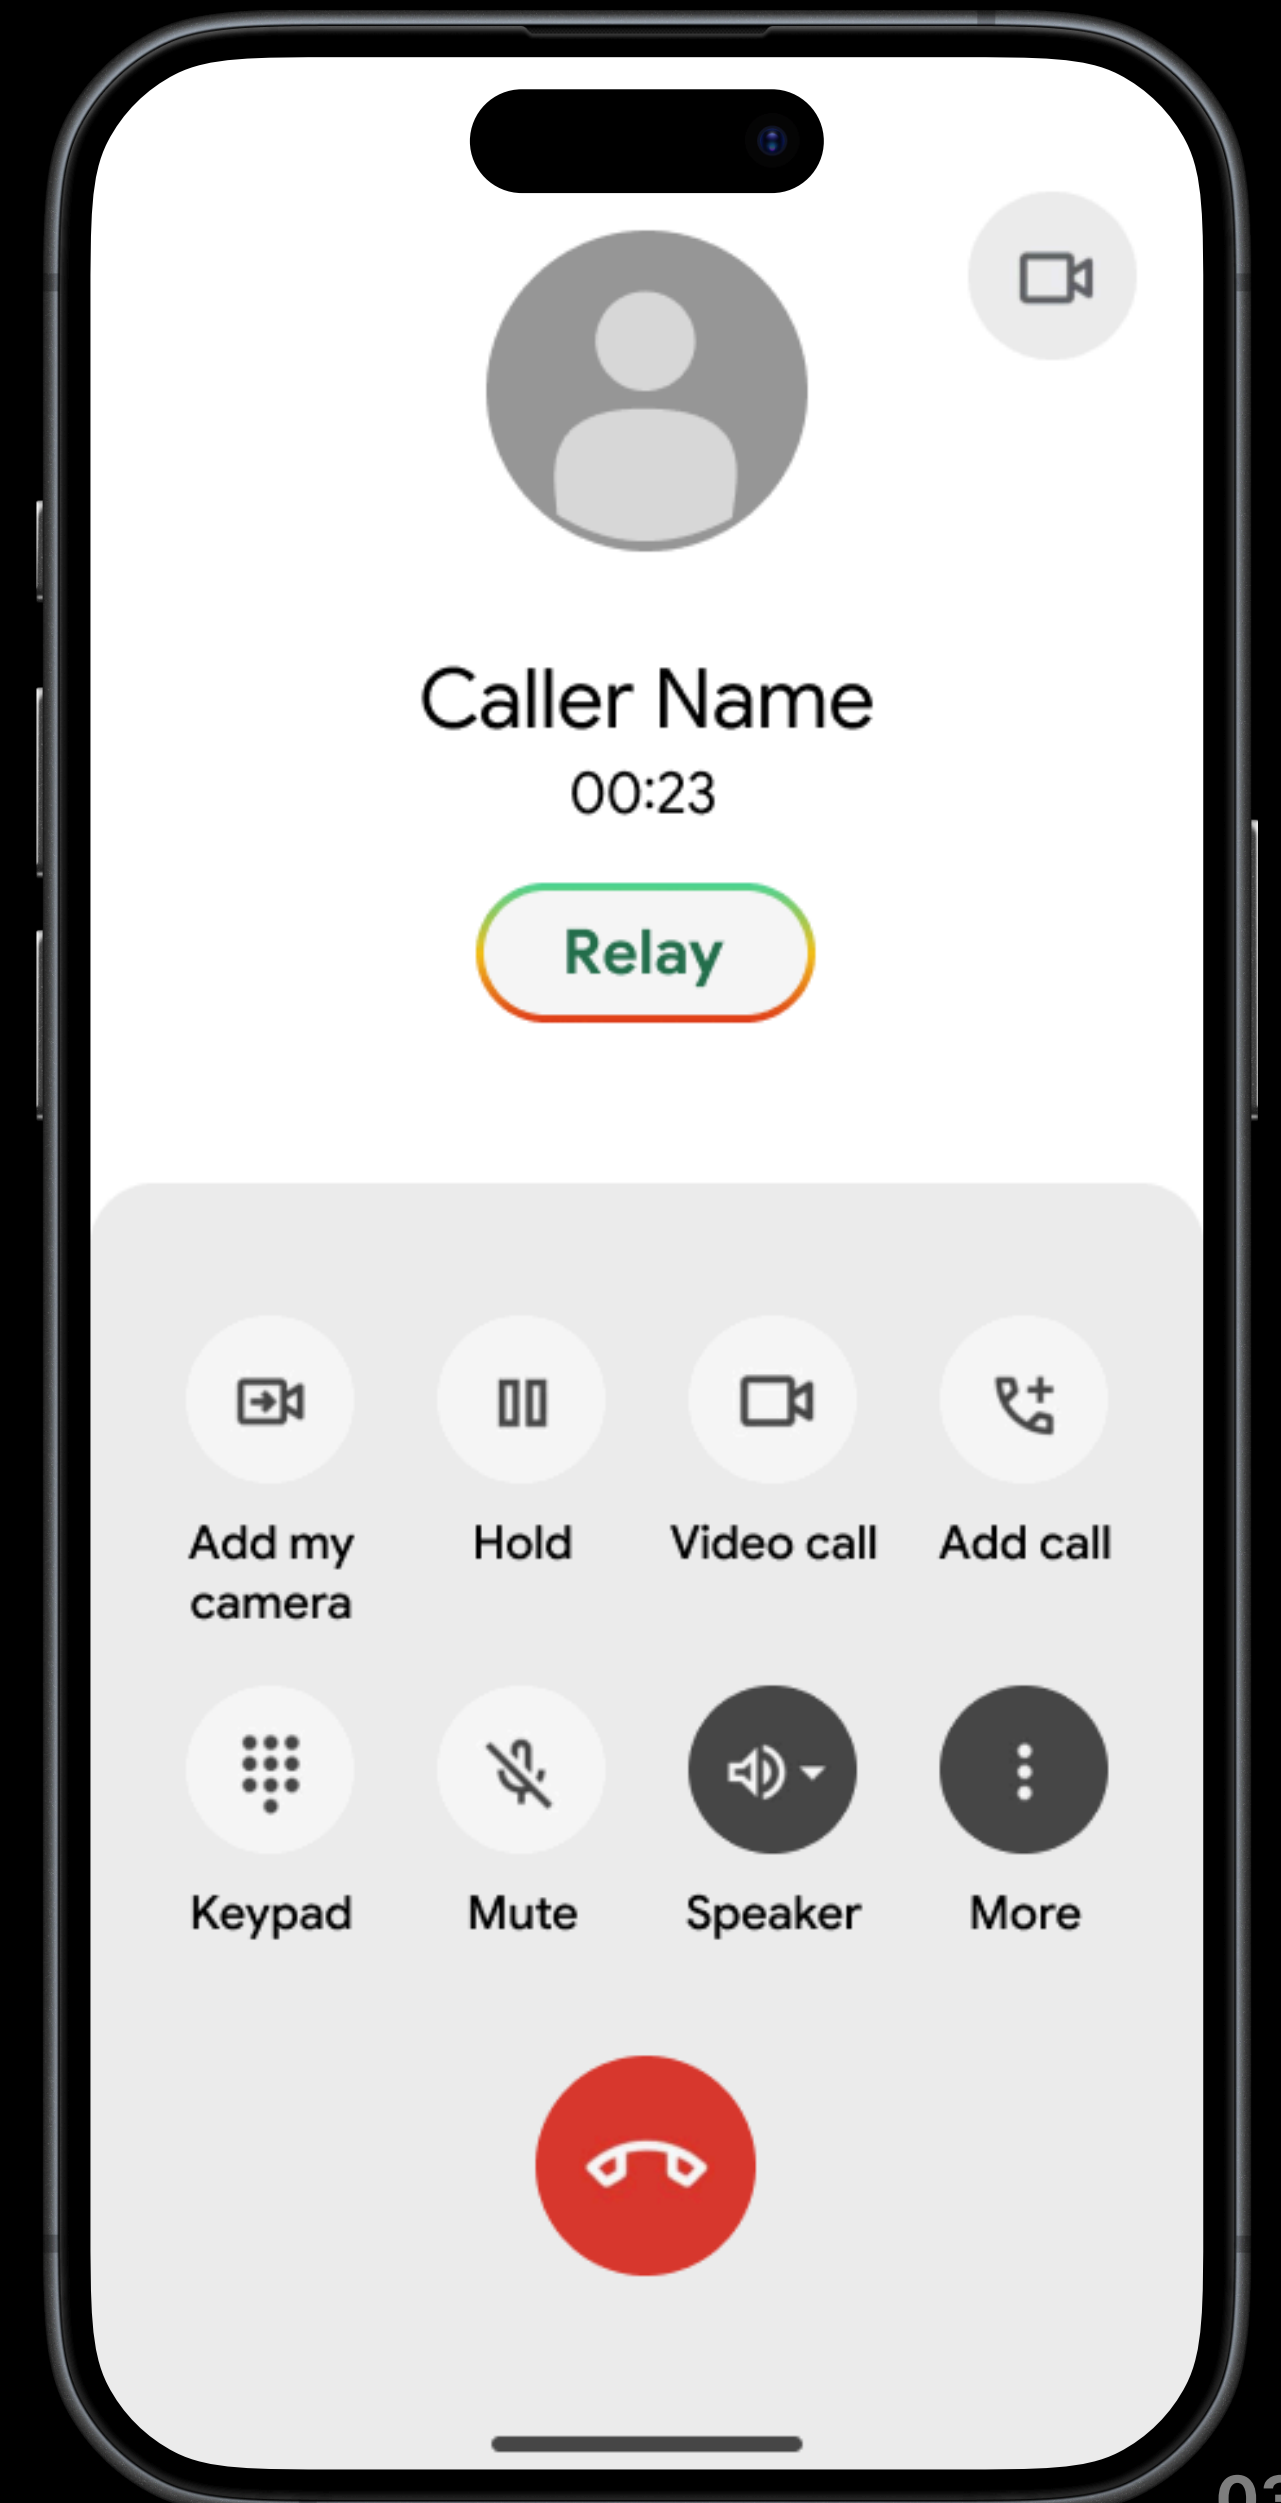

Integrated directly within your phone

Makes calls, takes calls

Communicable via SMS and/or voice

Offers full post-conversation transcripts

**Activated with one button**

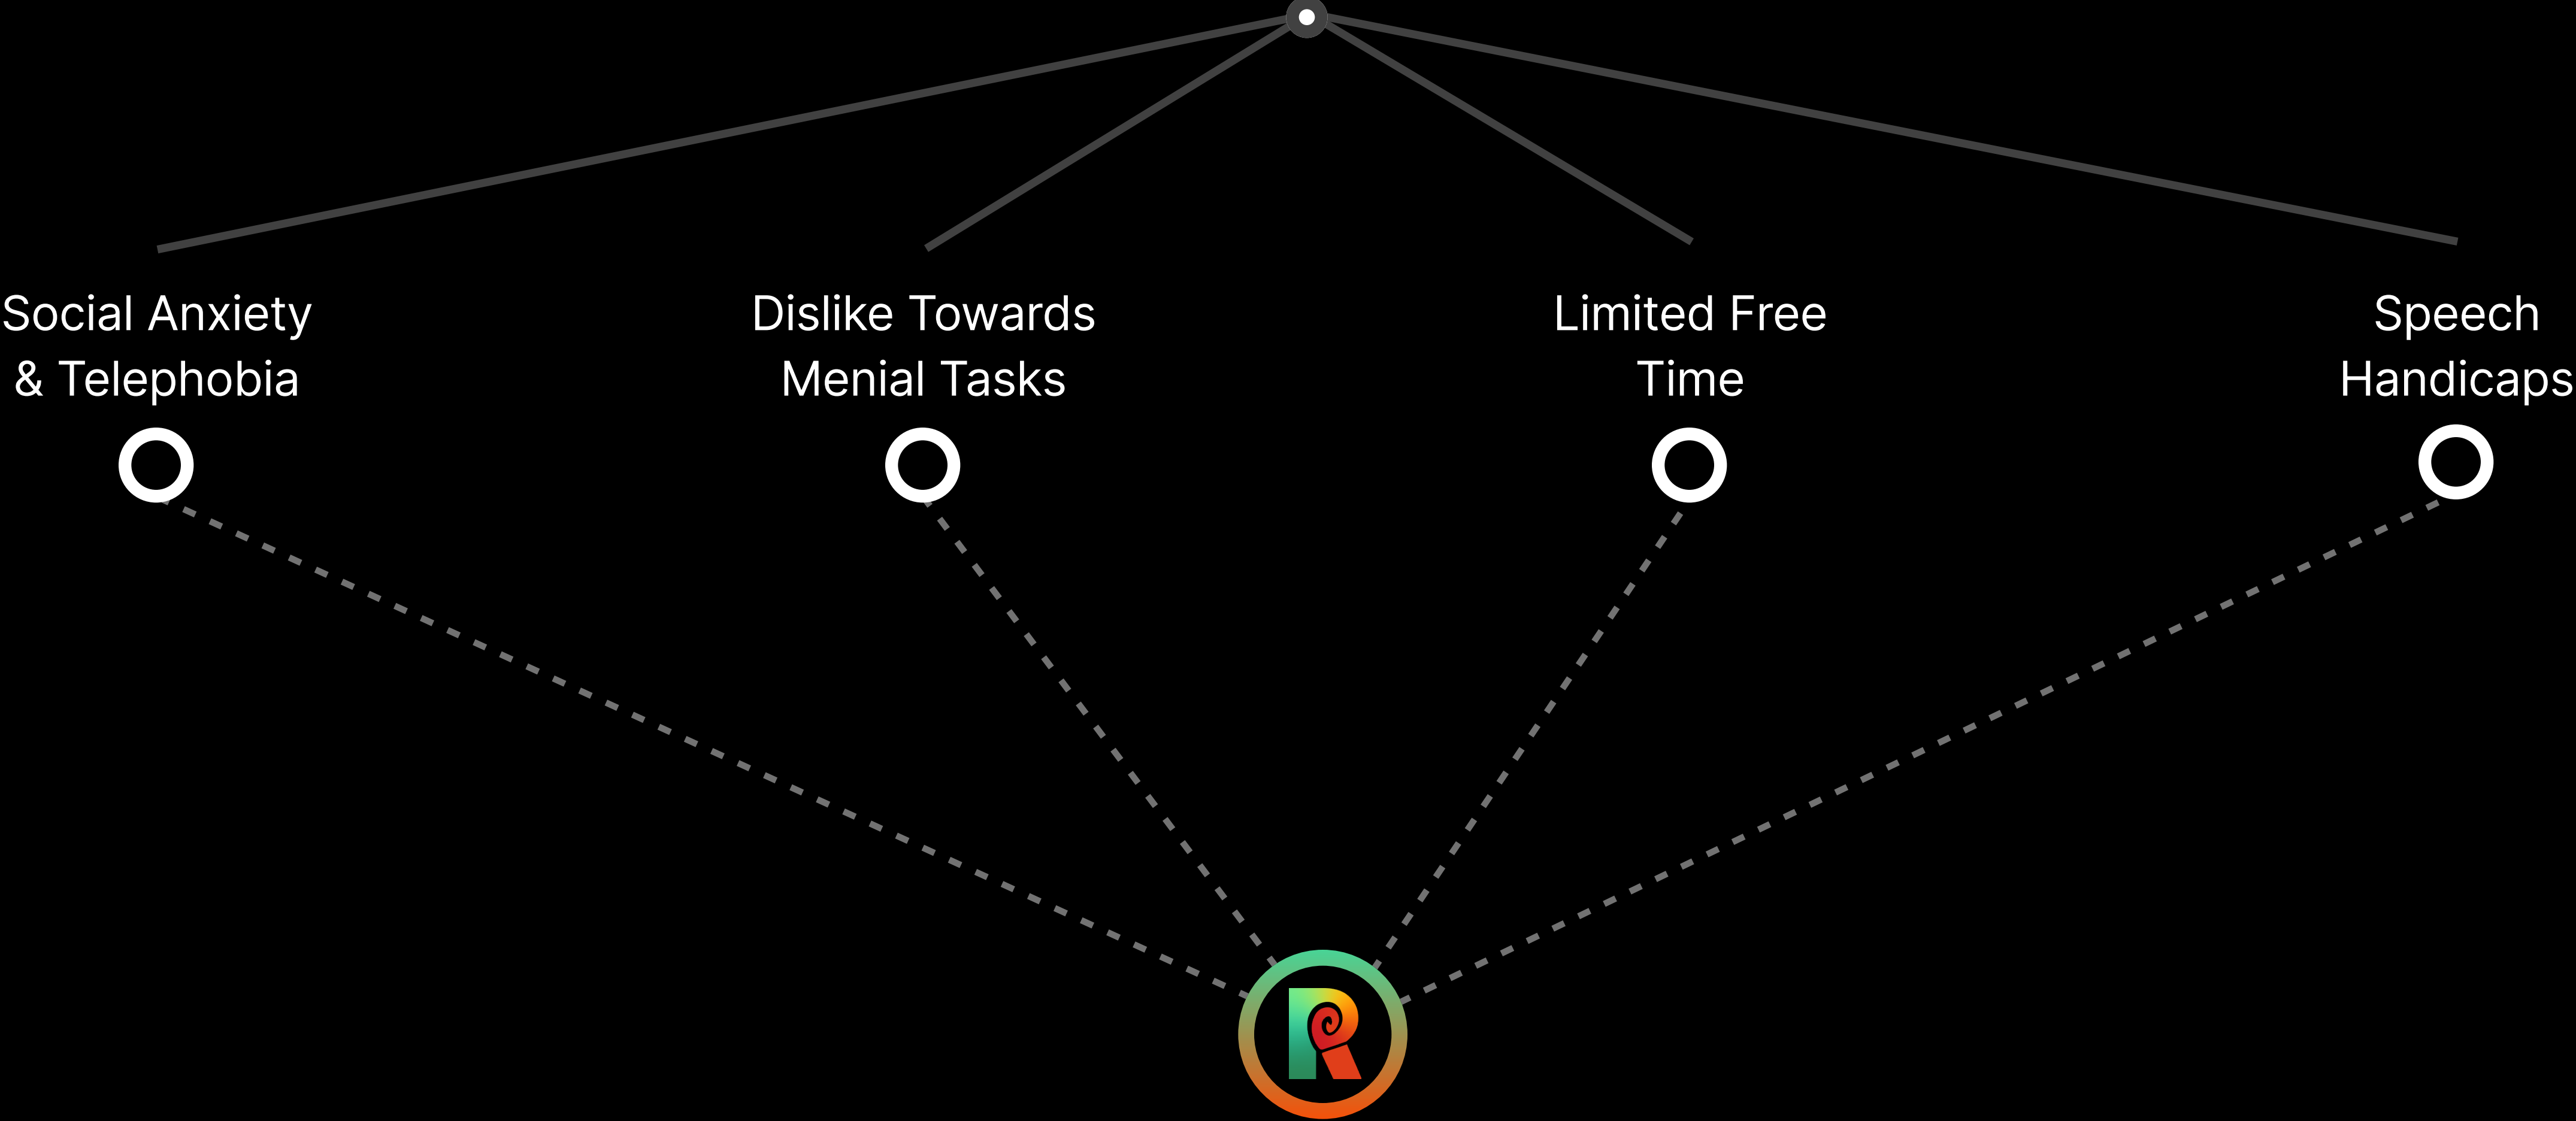

At its core,

**Relay is a service that makes  
annoying phone calls disappear**

---

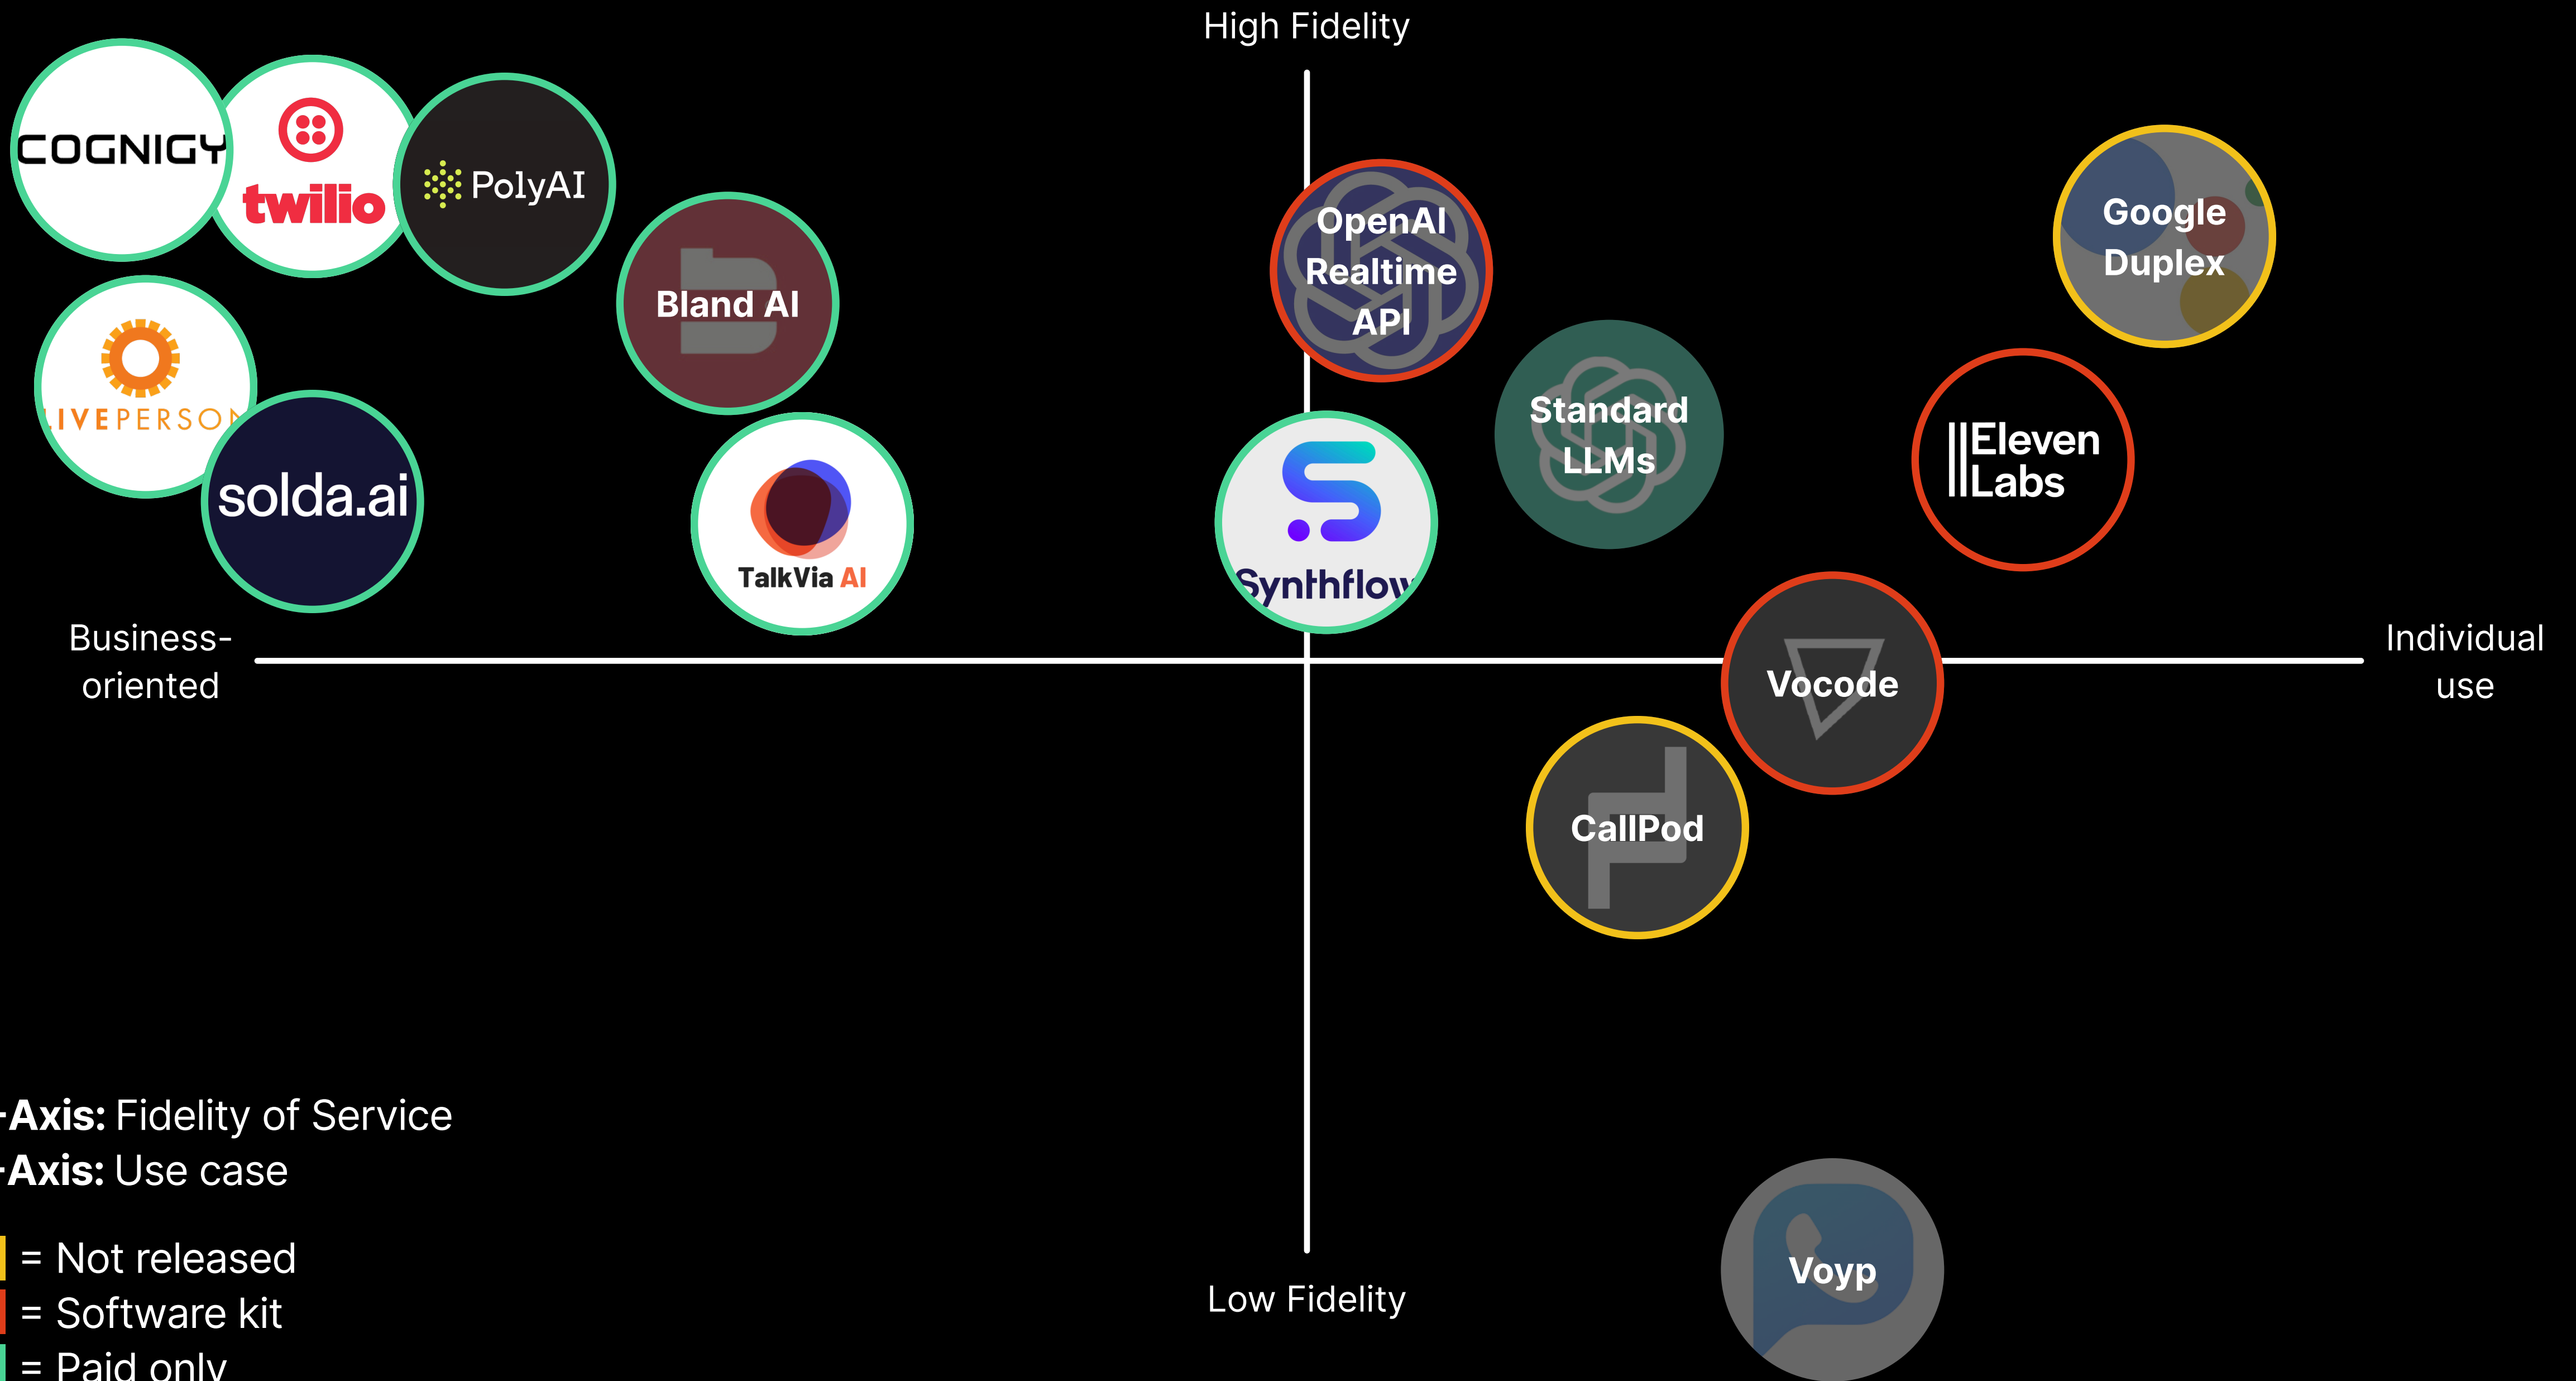

# Who is Relay For?

**Anyone who simply cannot take or make a phone call at any time.**

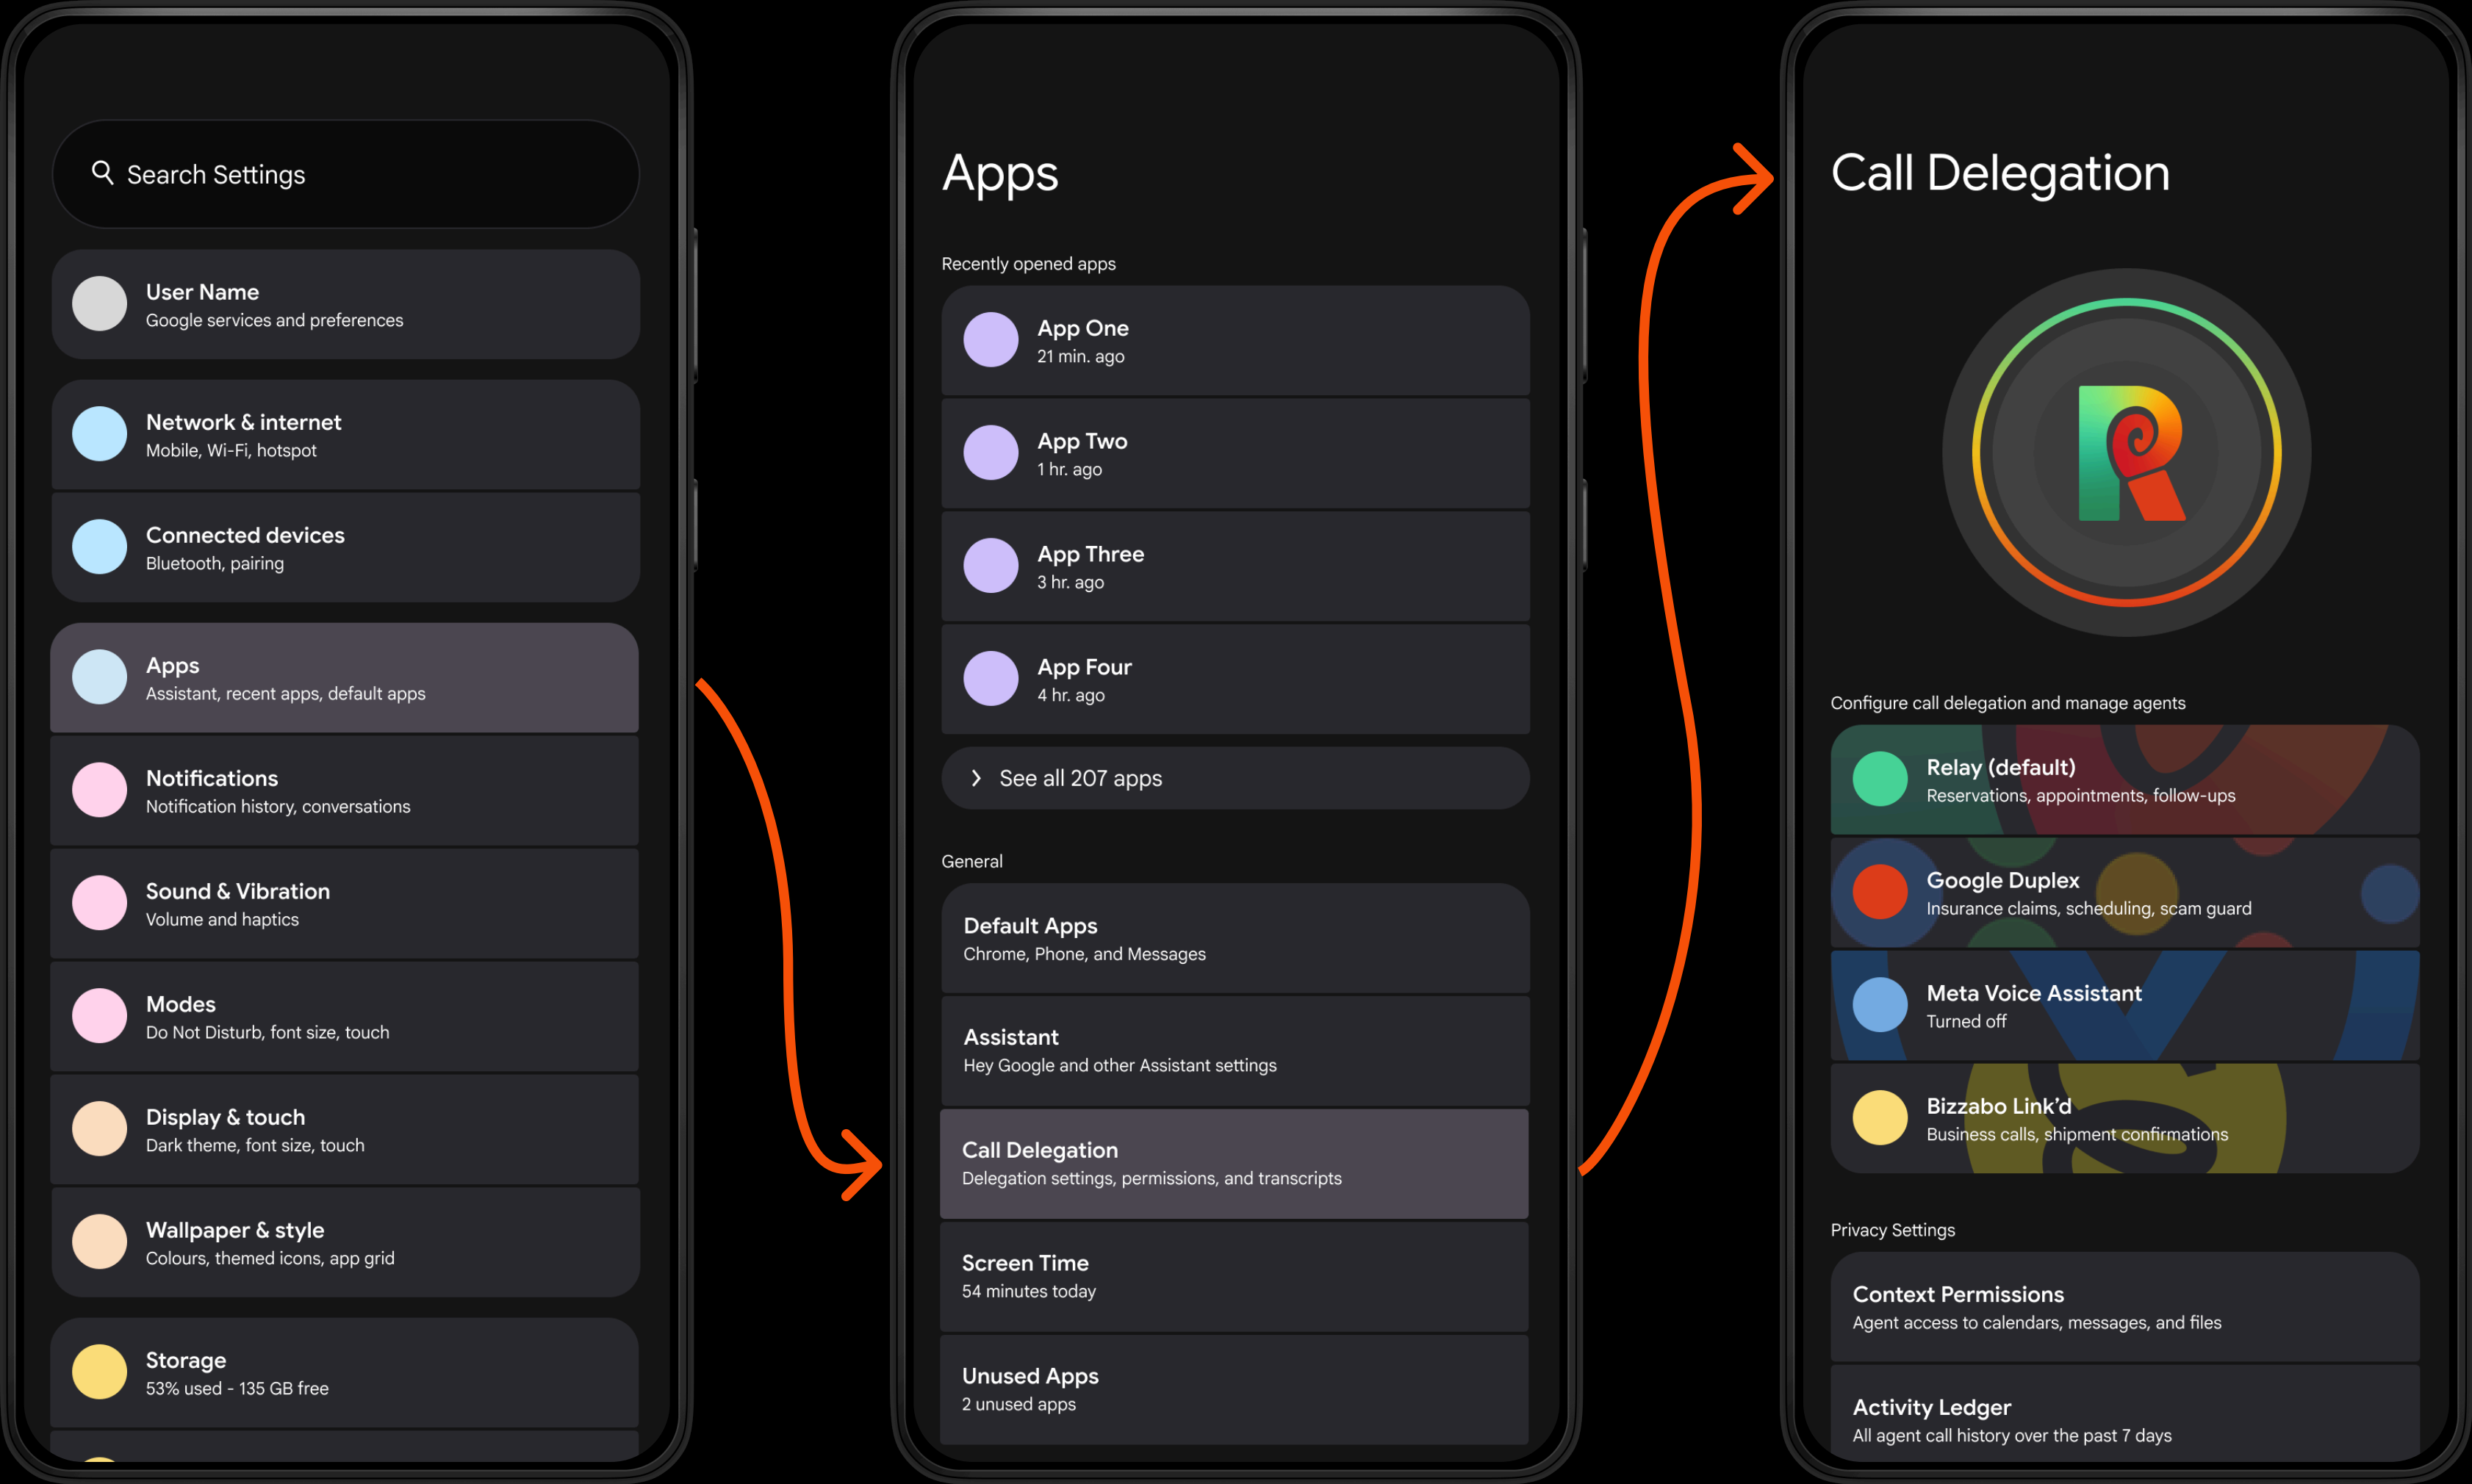

# What Makes Relay the Answer?

# Current Call Delegation Options

# What is **Switchboard**?

# Switchboard is a **system** that allows universal **call delegation** between AI voice agents

Twilio  
Apple Live VM  
Google Assistant  
**Relay**  
Google Duplex  
Voyp  
Cognigy

API Bridge

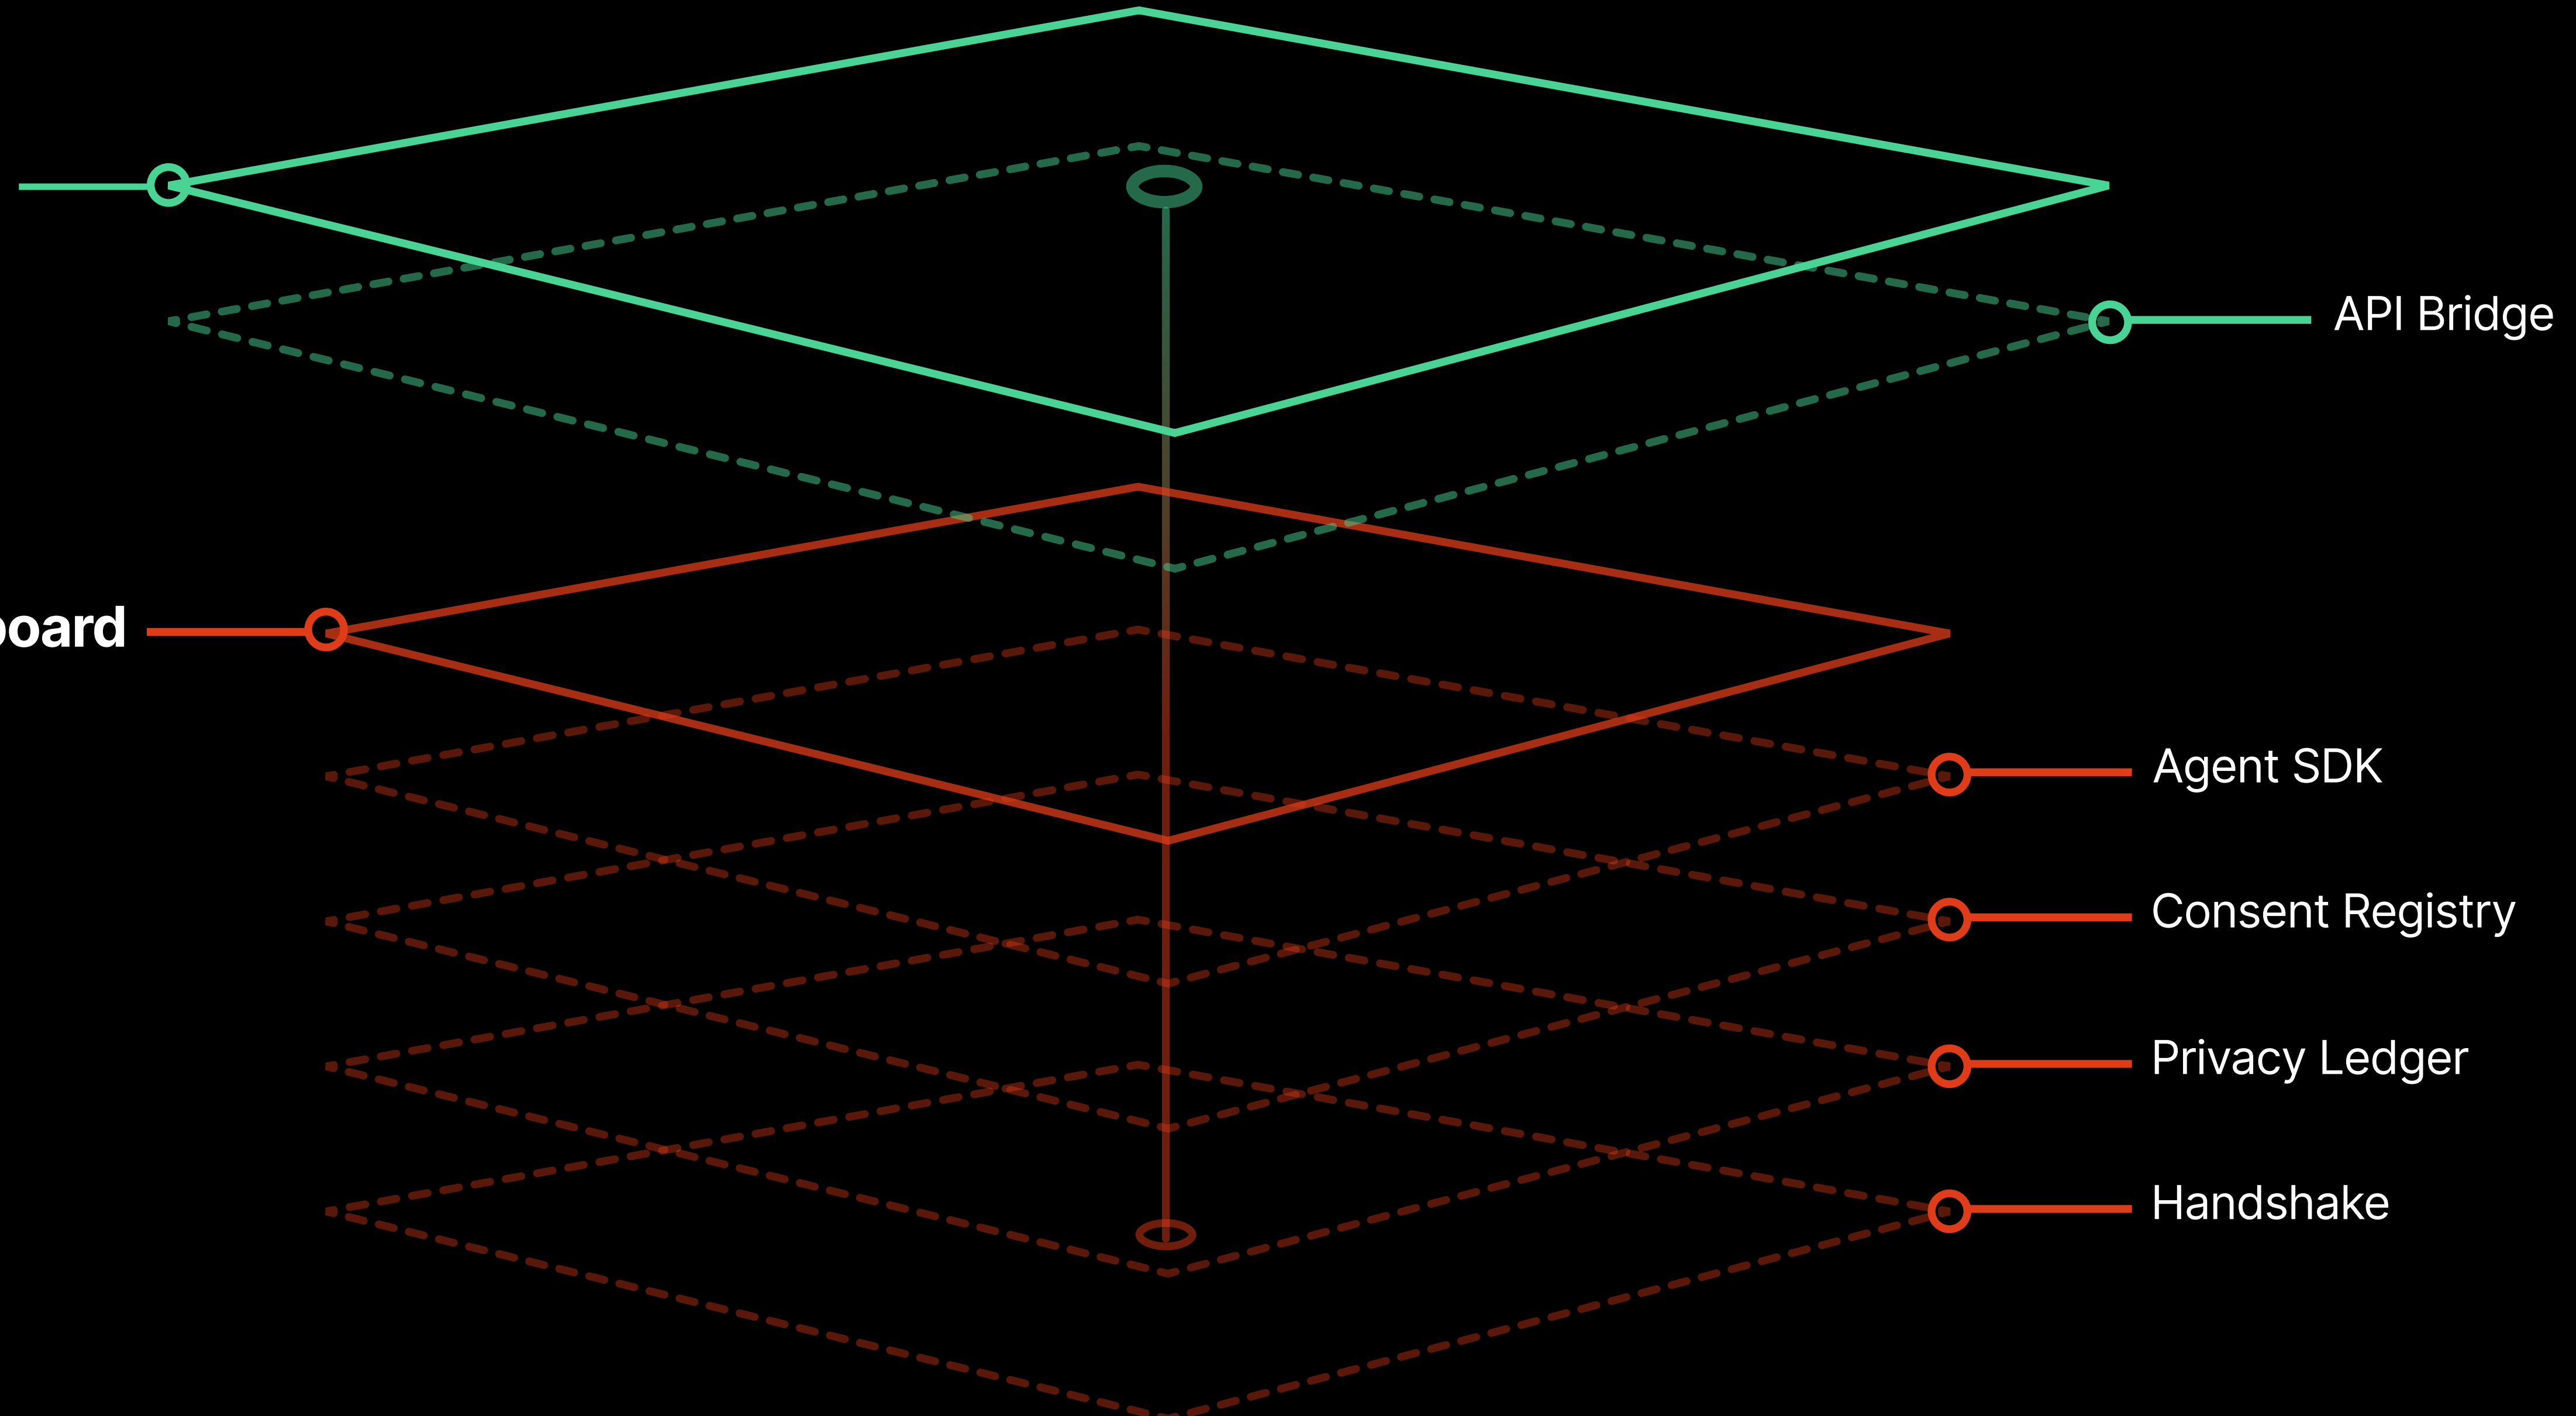

**Switchboard**

Agent SDK

Consent Registry

Privacy Ledger

Handshake

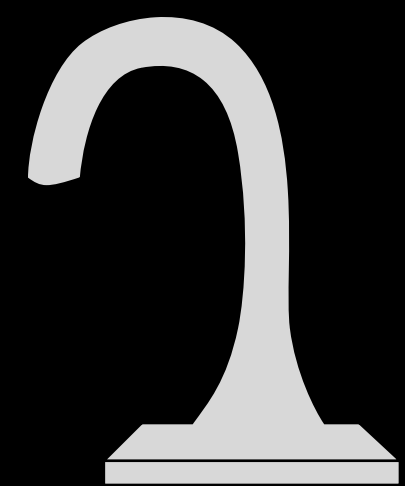

**Relay and Switchboard are **NOT**  
two separate products**

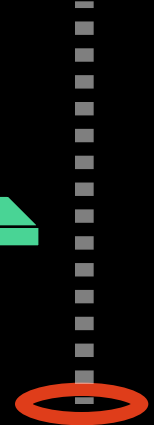

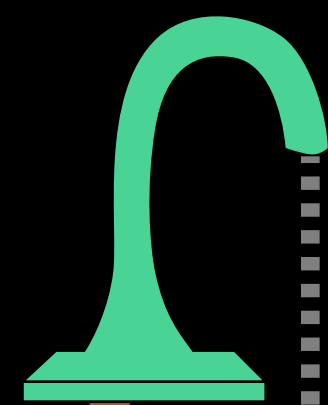

Relay is the **consumer product**

Switchboard is the **ultimate disruptor** behind it

**A sink faucet cannot exist without plumbing**

**Relay** is the faucet

**Switchboard** is the plumbing behind it

# What's Next for Relay?

# Final Deliverables

By 06/05/26

## Functional Web/App Prototype

Fully interactive simulation of Relay that mimics how the interaction would go to a high-fidelity

## Video Demonstration

Video render of Relay being used

## System Diagram of Switchboard

Figma diagram simply explaining Switchboard's functionality

# Timeline

## February

Create comprehensive project research document, visual assets, and other groundwork going forward

## April

Create system diagram of Switchboard and final exhibition graphics

## End of January

Finalize concept

## March

Create functional prototype and short promotional render video of Relay app

## End of April - Early May

Finalize comprehensive GradEx presentation

**Switchboard** turns AI delegation from a product/service to a utility

**Relay** is the proof of concept

# Thank You
